Houses brimming with history, character and beautiful ideas

Clear thinking

ALICE LEIGH DESIGN
ALICE LEIGH, FOUNDER

“In this terraced house in West London, architect Mowbray Crawshaw created a sleek, double-height rear extension to improve flow and light for a growing family.

It’s a multi-functional space that incorporates a family sitting area leading to the garden, with a home office-cum-bar area on the floor above, which leads onto a more formal sitting room. The clients commissioned a glass floor for the office in order to maximise the light from the room below. Bespoke floating joinery, incorporating a desk to one side and a bar to the other, ensures there is no interruption to the glass floor. An original Serge Mouille light with a double arm extends into the room and adds to the overall architectural, pared-back appeal.” ▶

ALL In this restrained rear extension, bespoke floating joinery keeps the glass floor free of clutter. A classic Wishbone chair and a double-arm Serge Mouille wall light introduce a timeless air. For a similar rug, try Chloe Jonason Interiors.
